Translation and Interpretation in Telugu	02	2	0	0	For students who have studied the language up to Class VIII & above)	NIL

Learning Objectives :

The course aims the students an idea about the practical problems of translation and its interpretation in Telugu. It is prepared for bilingual and multilingual students proficient in translation and interpretation, who have sufficient knowledge of at least two languages, the source and the target language, and apply them adequately for all practical purposes. Besides, it also aims to build cross-cultural communications and enables the students to use different skills effectively to prepare themselves to take jobs in translation and interpretation.

This paper contains three units, namely, translation and interpretation: an introduction, translation theories, methods and problems of translation and practical and machine translation and interpretation practice. The first unit focuses on the translator, features of the translator, basic grammar, vocabulary, etc. Unit two emphasises different translation theories, methods and problems of translation. The last unit aims for problems in contemporary practical translation, the role of digital tools in translation and its advantages, problems in the contemporary era etc.

Learning outcomes:

Students will be able to build various professional, technical, and linguistic skills to take the job of translation and interpretation. Their knowledge in various fields in both the source and the target languages will help them translate in multiple areas and take interpretation jobs for the different target groups; the translator works with the written material/texts; the interpreter will mediate between languages orally.
